

Understanding our Transgender and Non-Binary Friends and Family Members

The world is changing fast, and no area more so than what we understand or misunderstand as gender. Pronoun usage - she, he, they - used to be simple and automatic but now a growing number of people identify as non-binary or transgender. According to the Williams Institute at UCLA, 10% of youth aged 13 to 17 identify as LGBTQ (CNN June 29, 2022).

The Corte Madera Women's Club invites interested parents and community members to a presentation from Lolma Olson to help us better understand our transgender and non-binary friends and family members. Lolma was the director of Patient Relations at California Pacific Medical Center in San Francisco and was CEO of her own consulting business working with large hospital systems.

Tuesday, November 1 at Noon. Corte Madera Community Center, 498 Tamalpais Drive. Bring your own brown bag lunch if you wish. Please let us know of your interest to ensure sufficient seating:
